

Nursing Dashboard

Are your nurses spending precious hours manually compiling and analyzing data to understand how their units are performing? Nursing dashboard is the answer to their data woes, bringing information to their fingertips while also saving valuable time in their busy schedule.

Pivotal to providing cost effective, quality care is the ability for nurses to easily monitor the operations of their units without distracting themselves from their routine patient care duties. Nursing dashboard is an efficient way for nurses to get the information they need when they need it. Built from the Health Care DataWorks Enterprise Data Model, the dashboard provides nurses an intuitive view into diverse data made simple to understand and easy to navigate.

Features:

- “At a glance” traffic light of metrics
- Instant comparisons to targets or budget without any complex querying
- Detailed trends, comparisons, and projections with just a mouse click
- Drill Down by Business Unit, Cost Center to individual nursing staff

Indicators Include:

- Falls
- Falls with Injuries Rate
- Medication Errors
- Pressure Ulcers
- Assessment within 24 Hours
- Restraint Documentation
- Hospital Acquired Pneumonia
- Hospital Acquired Pressure Ulcers
- Pain Management
- Hospital Acquired Infection
- Hand Hygiene

Value:

In the ever increasing complexity of the health care environment and the pressure to demonstrate and comply with pre set standards in quality of care delivery, nurses need tools that allow them to monitor their progress as easily as viewing the speedometer in a car.

The Nursing Dashboard:

- Automates time consuming reporting & delivery-processes
- Online dashboards are easy to access and understand
- Analyzes KPIs that have the greatest impact on the operations of the nursing units
- Decision Support tools and Alerts eliminate guesswork and focus attention
- Identifies areas that are performing well and build on their successes
- Identifies areas that require improvement
- Provides visibility into the operations of units
- Creates accountability through use of facts
